Reflect on the topic

Early detection of forest fire and prevent the disaster

What went poorly?

Early detection of forest fire

An effort to make forest safer

Effects due to wrong prediction

Lack of knowledge in fire prediction

implementation of AI in preserving forest.

usage of various detection algorithm.

High Efficiency

Accurate prediction forest fire

The model should predict the forest fire precisely

Implement the measures to prevent

Image processing Algorithm (pixel camera for smoke and fire detection)

What ideas do you have?

Accurate prediction of fire
Deployment of Artificial Intelligence
Implementation of CNN

How should we take action?

Input Image Analysis

Usage of algorithm for image processing

Smoke and Fire Detection
